1. Platform Overview

Test Routify is a UK driving-test learning platform that connects learner drivers with real, GPS-synchronised dashcam footage of local test routes — and lets them practise those routes as turn-by-turn British English voice navigation, exactly like a sat-nav but for their actual driving test.

It also connects learners directly with verified **Approved Driving Instructors (ADIs)** for lesson bookings, and gives instructors a professional tool to upload routes, earn reputation, and grow their driving business.

The core loop

```
ADI records a test route while driving → uploads it to Test Routify
↓
Platform AI processes it automatically
(GPS validation · privacy blur · quality score · voice instructions)
↓
Admin reviews and publishes the route
↓
Learner finds the route for their test centre
↓
Learner watches the real drive · practises with voice guidance
↓
Learner books the ADI for a real lesson · passes their test
```

Recording: ADIs can record and upload the **GPS track (GPX)** and the **video separately** — a route may start life as GPS-only and gain video later (see the Instructor Journey).

What makes it unique

FEATURE	TEST ROUTIFY	YOUTUBE	THEORY APPS
Real test-route footage	✓ Test-centre specific	✗ Hit and miss	✗ Not applicable
GPS-synchronised video	✓ Frame-perfect	✗	✗
British English voice practice	✓ Like the real test	✗	✗
Verified ADI instructor booking	✓ Built-in	✗	✗
AI learning summaries	✓ Post-session	✗	✗
Offline access	✓ Encrypted	✗	Partial
GDPR-compliant privacy blur	✓ Automatic AI	Manual	✗

2. The Three Roles

Learner Driver

A person learning to drive in the UK who wants to familiarise themselves with their test routes before test day.

- **Accesses via:** Web app (any browser) or mobile app (iOS/Android)
- **Registration required:** Every user must create an account — there is **no anonymous access**, not even for the demo
- **Browses freely:** Test centres and their routes are fully browsable — there is **no** test-centre/test-date gate
- **Demo (free):** The **first route you open** becomes your one free demo route (account-wide, any centre); view or practise **one route total** across the whole account
- **Premium plan:** Unlimited routes **for each purchased test centre** — Premium is bought **per test centre** and is **not switchable**, plus practice mode, AI summaries, offline access
- **No Premium needed to:** Book an instructor

Instructor (ADI)

An Approved Driving Instructor (DVSA-registered) who uploads routes and optionally accepts lesson bookings through the platform.

- **Accesses via:** Web app or mobile app
- **Core tools:** Route upload, availability management, booking management
- **Optional:** Subscribe to the Premium Route Library (same subscription as learners) to **practise test centres** themselves

Admin / Moderator

Test Routify internal staff who review uploaded routes, verify instructor credentials, manage users, and oversee platform revenue.

- **Accesses via:** the admin console inside the web app at `/admin` (desktop browser). Admins/moderators land there automatically after sign-in.
- **Requires:** `admin` or `moderator` role

3. Learner Journey — Full Cycle

Step 1 — Create an Account

Open <http://localhost:5174> (or the production URL).

Option A — Register

1. Click "New here? Create an account"
2. Enter: Display name · Email · Password
3. Click **Create account** — you're logged in immediately

Option B — Demo (registration still required)

1. Register an account — **there is no anonymous access**
2. Browse freely — the **first route you open** becomes your one free demo route (account-wide, any centre); you can view or practise **one route total**
3. Video player and voice practice work fully on that one demo route

No gate: there is no test-centre/test-date step. Learners browse test centres and routes freely; access is decided per route (free demo route, then the per-centre paywall).

Step 2 — Test Centres & Discover Routes

After login you land on the **Test Centres** page — a browsable list of centres. Open a centre to see its routes, or go to **Discover Routes** to see the full catalogue.

- A grid of published routes appears, sorted by quality score
- Each card shows: **Route name** · **Test centre town** · **Difficulty** · **Distance (miles)**
- Each card carries an **instructor byline** — avatar + name + a verified badge (click it to open the instructor's profile)
- Colour-coded quality badges: green (70+) · amber (50–69)

Step 3 — Search Routes

There is one **global search** on the **Discover Routes** list (no separate search page or header search bar).

1. Type into the search box on the Discover page
2. It matches across **route title, instructor name, test centre, town/city, and postcode** (e.g. "Mill Hill", "NW7", or an instructor's name)
3. Results filter live as you type

Step 4 — Watch a Route

Click any route card → Route Detail page.

Click ► **Watch route**.

The **video player** opens with four viewing modes:

MODE	WHAT YOU SEE
Front	Driver's-eye view, road ahead
Rear	Rear window view
Split	Both cameras side by side
Map	GPS track on a live map, car position updating in real time

Timeline controls:

- Scrubber bar at the bottom — drag to any point
- Junction and roundabout markers above the scrubber — click to jump directly to that moment
- Play/Pause · 0.5× slow motion
- HUD shows current time · active junction label · total duration

Demo note: Without Premium you can view or practise **one route total** across the whole account. Premium is purchased **per test centre**, so any route for a centre you haven't subscribed to redirects to the upgrade screen.

Step 5 — Practise a Route (Premium)

Go back to the Route Detail page.

Click 🕒 **Practice route**.

The **Practice mode** opens — *no video, just like the real test*.

CONTROL	ACTION
Start	Begins the session; clock starts counting
Stop	Pauses the session
Restart	Returns to the beginning

As time progresses, the app reads turn instructions aloud in **British English**:

- "In 200 metres, turn left"
- "At the roundabout, take the third exit"
- "Bear right at the junction"
- "You have reached your destination"

Run the route 5–10 times and the instructions become automatic.

Step 6 — AI Learning Summary (Premium)

After completing a watch or practice session, the app generates a personalised summary:

- **Key junctions to remember** on that specific route
- **One focus area** (e.g. "Watch your mirror signal manoeuvre sequence at the roundabout")
- **Encouragement** based on your session count

The summary appears as a card after the session ends.

Step 7 — Track Progress

Navigate to **Account** → **View progress** (or `/account/progress`).

The Progress page shows:

STAT	WHAT IT MEASURES
Routes watched	Total unique routes you've viewed
Practice runs	Total voice practice sessions completed
Watch time	Total time spent watching routes
Current streak	Consecutive days you've practised
Best streak	Your longest consecutive practice run

Below the stats: a full **Route History** list with completion percentage bars for each route.

Step 8 — Book an Instructor

There is no standalone Instructors browse tab — instructor identity surfaces through routes.

Finding an instructor:

1. On any route card or route detail, click the **instructor byline** (avatar + name + verified badge)
2. This opens the instructor's **Profile page** — avatar, name, verified badge, the routes they created, and the test centres they cover
3. Their bio, lesson price, reputation, and available time slots are shown here

Booking a lesson:

1. On the instructor's **Profile page**
2. Read their bio and see their available time slots
3. Click a slot to select it (highlighted)
4. Add an optional message (e.g. "Preparing for Mill Hill test — need roundabout practice")
5. Click **Request lesson — £XX.XX**
6. A booking request is created — the instructor confirms it

Managing bookings:

- Navigate to **My Bookings** (via nav or `/bookings`)
- See all upcoming and past bookings with status: Pending · Confirmed · Completed · Cancelled
- Cancel any pending or confirmed booking from this screen

Step 9 — Upgrade to Premium

Navigate to **Account** → **Upgrade** or go to `/paywall`.

PLAN	PRICE	BEST FOR
Demo (Free)	£0	Browsing; one route total across the account
Premium Monthly	£4.99/month · per test centre	Test coming up soon
Premium Yearly	£39.99/year · per test centre	Long-term learners (save 33%)

Booking an instructor does NOT require Premium. Anyone can book a lesson.

Premium is per test centre and not switchable. Each subscription unlocks one specific centre; to prepare at more than one centre, hold one subscription per centre.

Premium includes:

- ✓ Unlimited routes for **each purchased test centre** (one centre per subscription, non-switchable)
- ✓ Practice mode with UK voice guidance
- ✓ Multi-view playback (front · rear · split · map)
- ✓ AI-generated learning summaries
- ✓ Offline route access (mobile app)
- ✓ Verified instructor routes

Step 10 — Install as a PWA (Add to Home Screen)

On the **Account** page, if your browser supports installation:

1. An "  **Install Test Routify**" card appears
2. Click **Install** → browser's native install dialog appears
3. The app installs to your home screen and runs fullscreen like a native app

On iPhone/iPad:

1. Open in Safari → Share icon → "**Add to Home Screen**" → **Add**

The installed app works **offline** for cached routes and practice mode.

4. Instructor (ADI) Journey — Full Cycle

Step 1 — Register an Account

Same as the learner registration. URL: <http://localhost:5174>

Register with your professional email. Your account starts as a standard user.

Step 2 — Accept the Footage Agreement

Before uploading any routes, you must accept the **Footage Licensing Agreement** — confirming you have the right to publish the dashcam footage.

1. Navigate to **Contribute** (via Account page or nav)
2. The agreement is presented on first visit
3. Click **Accept** — one-time action, never asked again

Step 3 — Submit Your ADI Verification

1. In the **Contribute** section, click "  **Become a verified instructor**"
2. Enter your **DVSA ADI licence number** (e.g. ADI78341)
3. Upload your **ADI certificate** or provide a link to evidence
4. Click **Submit**

A Test Routify admin will review your application (typically within 24 hours).

After verification you receive:

-  A **Verified Instructor** badge visible to all learners
-  Your routes appear **higher in search results**
-  **Fast-tracked** route approvals (admin prioritises your uploads)
-  An **instructor reputation bonus**

Step 4 — Set Up Your Instructor Profile

After verification, complete your professional profile:

- Bio — describe your experience and specialisms
- Years of experience
- Lesson price (£/hour) — default is £35
- Service area — the postcodes and areas you cover
- Toggle "**Accepting bookings**" on or off at any time

This is what learners see when they search for instructors.

Step 5 — Upload a Route (with Video)

1. In **Contribute**, click "  Upload a new route"
2. Fill in the details:
- Route title (e.g. "Mill Hill Test Centre — Roundabout Route")

- Description (optional but helps learners)

- Target test centre

- Difficulty level
3. Attach your files:
- **Front camera video** — one or more MP4 clips (multiple clips stitched automatically)

- **Rear camera video** — optional but strongly recommended

- **GPX file** — GPS track from your dashcam or a phone GPS app
4. Tick the licensing agreement checkbox
5. Click **Upload** — you're taken to the live status page

Pipeline stages (all automatic):

STAGE	WHAT THE PLATFORM DOES
Ingest	Receives and stores your files securely
Clip sort	Orders multiple clips by recording timestamp
Gap detection	Finds any gaps or overlaps between clips
Merge	Stitches all clips into one continuous video
GPS validation	Checks GPS track for accuracy, drift, speed anomalies
Sync engine	Aligns video frame-by-frame to GPS coordinates
Privacy blur	AI detects and blurs all faces and number plates
Quality score	Calculates overall score 0–100 (GPS + video + sync)
Navigation	Generates British English turn-by-turn instructions
Ready for review	Admin is notified to approve and publish

Typical processing time: **2–5 minutes** for a 20-minute route.

Step 6 — Upload a GPS-Only Route (No Video Yet)

If you've driven a route but don't have video footage yet:

1. Upload the **GPX file only** — no video required
2. Route is processed as a **"Map only"** route
3. Learners can immediately use it in **map practice mode**
4. Any verified ADI can attach video later (including you or a colleague)

To attach video to an existing map-only route:

1. Find the route in the catalogue — it shows a "Map only" badge
2. Click **"Contribute video to this route"**
3. Upload front/rear video clips
4. System merges them with the GPS and upgrades to full video automatically

Step 7 — Set Availability Slots

Let learners know when you're available for lessons:

1. Go to your instructor settings
2. Add slots: select date · start time · end time
3. Repeat for each available day
4. Learners see only **available (unbooked) slots** on your profile

You can remove any slot that hasn't been booked. Booked slots require a cancellation.

Step 8 — Manage Lesson Bookings

When a learner requests a lesson, you receive an in-app notification.

Navigate to **My Bookings**:

ACTION	WHEN TO USE
Confirm	Accept the learner's request — lesson is now booked
Decline	Turn down the request (add a reason)
Mark completed	After the lesson takes place
Mark no show	If the learner doesn't attend
Cancel	If you need to cancel — slot becomes available again

Booking statuses: **Pending** → **Confirmed** → **Completed** / **Cancelled** / **No show**

Step 9 — ADI Account Security

Test Routify enforces **one active session per ADI** at all times:

- Logging in on a new device **immediately signs out all other devices**
- Prevents licence sharing and protects your uploaded content
- If you're signed out unexpectedly, the login screen shows:
- *"You were signed out because your account was used on another device"*

Step 10 — Earn Credits, Reputation & Badges

Every published route earns:

- **Credits** — platform currency (future marketplace use)
- **Reputation points** — based on publish volume, quality scores, and instructor status

Badges:

BADGE	HOW TO EARN
 First Route	Publish your first route
 10 Routes	Publish 10 routes
 50 Routes	Publish 50 routes
 High Quality	Consistently score above the quality threshold
 Verified Instructor	DVSA ADI status confirmed by admin

5. Admin Journey — Full Cycle

Admin console: sign in to the web app at **http://localhost:5174** as an admin/moderator — you land on `/admin` automatically.

Login: `demo@routesync.uk` / `Password123!`

Dashboard Header

The top bar always shows live platform stats:

- **Users** — total registered accounts
- **Published** — total live routes
- **Premium** — active premium subscribers

Review Queue — Approving Routes

The most important daily task. Every upload appears here before going live.

Per route row:

- Title and contributor
- Quality score (colour-coded: green ≥ 70 , amber 50–69, red < 50)
- Sync confidence %
- **Instructor** badge — fast-tracked routes from verified ADIs
- **Map only** badge — GPS-only routes (no video)
- Submission date

To review:

1. Click **Review** →
2. A side panel opens:
 - **Thumbnail** of the route
 - **Quality metrics**: GPS score · Sync confidence · Overall score
 - **Pipeline stages** — every stage with its status (done/skipped/flagged/failed)
 - **Video renditions** — view · resolution · duration for each file
3. **Approve & publish** — route goes live immediately for all users
4. **Reject** — enter a reason; the contributor sees this in their upload status

Users — Account Management

Search any user by name or email.

Change role:

ROLE	PERMISSIONS
user	Browse, subscribe, book lessons
contributor	+ Upload routes
instructor	+ Receive lesson bookings (verified ADI only)
moderator	+ Review routes, handle reports
admin	Full platform access

Suspend / Reinstate:

- Click **Suspend** — account locked, user sees "Account suspended" on login
- Click **Reinstate** — access fully restored immediately

Instructors — ADI Verification

All pending ADI applications.

Each application shows:

- Applicant name and email
- ADI number submitted (e.g. ADI78341)
- Evidence link (click **View** ↗ to open the certificate document)
- Date submitted

Actions:

- **Verify** → Role upgraded to `instructor`, badge awarded, search boost applied
- **Reject** → Enter optional notes; applicant is notified and can reapply

Note: Tom Briggs in the test data has no evidence document — this demonstrates the "no evidence" state in the UI.

 Bookings — Platform Overview

Full table of all lesson bookings across the platform.

COLUMN	WHAT IT SHOWS
Date	Lesson date and start time
Learner	Who booked the lesson
Instructor	The ADI delivering the lesson
Status	Pending · Confirmed · Cancelled · Completed · No show
Amount	Total charged to the learner
Platform fee	Test Routify's revenue from this booking (10% of lesson fee)

Revenue — Financial Dashboard

Top stat cards:

- **Estimated MRR** — total monthly recurring revenue from all active subscriptions
- **Monthly subscribers** — count on the £4.99/month plan
- **Yearly subscribers** — count on the £39.99/year plan

Breakdown table:

Every unique combination of plan + status with subscriber count. Shows the full health of subscription distribution.

Community Fund

Test Routify contributes 10% of net profit to the Instructor Community Fund monthly.

Balance overview: Contributed · Paid out · Current balance

Monthly contribution:

- Runs automatically on the 1st of each month
- **Run now** — records the current month's contribution immediately (idempotent)

Beneficiaries:

1. Add a beneficiary (e.g. "North London ADI Network", "Individual Instructor — Sarah Johnson")
2. Select them when recording payouts

Recording a payout:

1. Select beneficiary from dropdown
2. Enter amount in pounds
3. Click **Pay out**

All transactions are publicly visible at `/api/fund/summary` — full transparency.

 Reports — Flagged Content

User-submitted content reports.

COLUMN	WHAT IT SHOWS
Target	Route/user/comment that was reported + truncated ID
Reason	Why the user reported it
Status	Starts as open
Date	When it was reported

Admins take action in the **Users** or **Review Queue** panels, then the report is considered resolved.

6. Feature Reference by Role

FEATURE	DEMO LEARNER	PREMIUM LEARNER	INSTRUCTOR	ADMIN
Browse route catalogue	✓	✓	✓	✓
View/practise 1 route total (account-wide)	✓	✓	✓	✓
Watch unlimited routes (per purchased test centre)	✗	✓	✓	✓
Practice mode (voice)	✗	✓	✓	✓

FEATURE	DEMO LEARNER	PREMIUM LEARNER	INSTRUCTOR	ADMIN
Community Fund admin	✗	✗	✗	✓
View all bookings	✗	✗	✗	✓

Access rules: Registration is required for all access (including the demo). Learners browse freely — there is no test-centre/test-date gate; the first route a user opens is their one free demo route. "Premium Learner" columns above apply **per purchased test centre** — a learner preparing at multiple centres holds one subscription per centre.

7. Subscription & Pricing

Consumer Plans

PLAN	PRICE	INCLUDED
Demo (Free)	£0	Browse + one route total (account-wide)
Premium Monthly	£4.99 / month · per test centre	Unlimited routes for one test centre
Premium Yearly	£39.99 / year · per test centre	Unlimited routes for one test centre + 33% saving vs monthly

Premium is purchased per test centre and is not switchable. Each subscription unlocks unlimited routes for one specific centre; learners preparing at multiple centres hold one subscription per centre. Registration is required for all access (including the demo); learners then browse freely, with the first route they open becoming their one free demo route.

Instructor Lesson Bookings

- Each ADI sets their own **lesson price** (default £35/hour)
- Test Routify charges a **10% platform service fee** added to the lesson price
- Example: £35 lesson → learner pays £38.50 → instructor receives £35 → Test Routify keeps £3.50
- The platform fee % is configurable by admin without a code deploy

Community Fund

- **10% of Test Routify's net profit** is contributed to the Instructor Community Fund every month
- Distributed to verified ADI contributors as a reward for building the content library
- Full public ledger at `/api/fund/summary` — complete transparency

8. Demo Walkthrough Scripts

Script A — Learner Demo (5 minutes)

"Let me show you what a learner driver experiences."

STEP	WHAT TO SAY	WHAT TO DO
1	"Registration account needed — then you browse freely"	Open http://localhost:5174 , register (one free demo route; no test-centre/date gate)
2	"You land on Test Centres — open a centre, or browse all routes on Discover"	Show Test Centres, then the Discover grid
3	"Each card shows the route, distance in miles, instructor byline, quality score"	Point to a card
4	"Let me open one"	Click any route → Route Detail
5	"This is actual dashcam footage from a real car driving the test route"	Click ► Watch route
6	"Front and rear cameras simultaneously"	Click Split view
7	"Live GPS map — the car's position updates in real time"	Click Map view
8	"Click any marker to jump straight to that junction"	Click a scrubber marker
9	"Now watch this — Practice mode. No video. Just voice, like the real test."	Go back → click 🏠 Practice route
10	"British English — exactly what they'll hear in their head on test day"	Click Start , let 2 instructions play
11	"Do this 10 times at home and test day feels familiar, not frightening"	Pause

Script B — Instructor Demo (5 minutes)

"Now let me show you what an ADI gets from Test Routify."

STEP	WHAT TO SAY	WHAT TO DO
1	"Sign in as our demo instructor"	Login as <code>instructor@routesync.uk</code>
2	"This is the contributor dashboard — reputation, credits, badges"	Show Contribute page
3	"Upload is simple — front cam, rear cam, GPS file. Multiple clips are fine."	Show Upload page briefly
4	"The platform handles everything — blurs faces and plates automatically"	Describe pipeline
5	"Learners find you through your routes — every card carries your byline"	Click the instructor byline on a route card
6	"That opens your profile — price, bio, routes, and available slots"	Show Sarah Johnson's profile
7	"They pick a slot and request a lesson — you confirm or decline"	Show available slots
8	"All your bookings in one place"	Show My Bookings
9	"Payment is handled by the platform. You receive the lesson fee directly."	Mention Stripe Connect

Script C — Admin Demo (5 minutes)

"Here's the operations side — what the Test Routify team sees."

STEP	WHAT TO SAY	WHAT TO DO
1	"Admin console — login"	Open http://localhost:5174 , log in as demo@routesync.uk → you land on /admin
2	"Live platform stats at the top — users, published routes, premium subs"	Point to header
3	"Review Queue — every uploaded route lands here first"	Click Review Queue
4	"Quality score, sync confidence, GPS — all automatic"	Point to scores
5	"Let me open one and show you what we check"	Click Review → on any route
6	"Every pipeline stage, quality breakdown, full video details"	Walk through drawer
7	"One click to publish — learners see it immediately"	Click Approve
8	"Instructor verifications — three pending today"	Click Instructors
9	"ADI number, evidence certificate, verify or reject"	Show James Carter row
10	"Bookings — full picture of every lesson on the platform"	Click Bookings
11	"Revenue — MRR, subscriber breakdown"	Click Revenue
12	"Community Fund — 10% of profit back to instructors, fully transparent"	Click Community Fund

9. Test Accounts

Login Credentials

ROLE	EMAIL	PASSWORD	NOTES
Admin	demo@routesync.uk	Password123!	Full admin console access + web app
Instructor (verified ADI)	instructor@routesync.uk	Password123!	Has profile, slots, and 1 confirmed booking
Learner	learner@routesync.uk	Password123!	Has 1 confirmed booking with Sarah Johnson
Pending ADI 1	james.carter@example.com	Password123!	Shows pending verification in admin panel
Pending ADI 2	priya.sharma@example.com	Password123!	Shows pending verification in admin panel
Pending ADI 3	tom.briggs@example.com	Password123!	No evidence document — demonstrates that state

Quick-Start URLs

URL	WHAT OPENS
HTTP://LOCALHOST:5174	Consumer web app — lands on Test Centres
HTTP://LOCALHOST:5174/DISCOVER	Route catalogue + global search
HTTP://LOCALHOST:5174/BOOKINGS	My lesson bookings
HTTP://LOCALHOST:5174/ACCOUNT	Account settings
HTTP://LOCALHOST:5174/ACCOUNT/PROGRESS	Learning progress dashboard
HTTP://LOCALHOST:5174/PAYWALL	Subscription upgrade page
HTTP://LOCALHOST:5174/ADMIN	Admin console (admin/moderator land here after sign-in)
HTTP://LOCALHOST:3000/DOCS	Full API documentation (Swagger)
HTTP://LOCALHOST:9001	MinIO storage console (dev only)

Test Routify — Helping every UK learner pass first time.

Guide prepared: July 2026
